## History

The People First movement was started by people who have been labeled with an intellectual disability.

These citizens felt that it was time for a change in the way the community felt about people labeled with an intellectual disability.

### They had a vision.

They believed that an organized movement would help them have a strong voice in the community, create a better future, and finally take control of their own lives.

They wanted to be known as “People First”. Now there are people First groups all over the country and the world.
